

Preparação do Ubuntu Server

`sudo apt update && sudo apt upgrade -y`

`sudo apt install curl apt-transport-https -y`

```
linux@SiemSystem:~$ sudo apt install curl apt-transport-https -y
Reading package lists... Done
Building dependency tree... Done
Reading state information... Done
curl is already the newest version (8.5.0-2ubuntu10.6).
curl set to manually installed.
The following NEW packages will be installed:
  apt-transport-https
0 upgraded, 1 newly installed, 0 to remove and 0 not upgraded.
Need to get 3,970 B of archives.
After this operation, 36.9 kB of additional disk space will be used.
Get:1 https://pt.archive.ubuntu.com/ubuntu noble-updates/universe amd64 apt-transport-https all 2.8.3 [3,970 B]
Fetched 3,970 B in 0s (21.1 kB/s)
Selecting previously unselected package apt-transport-https.
(Reading database ... 117053 files and directories currently installed.)
Preparing to unpack .../apt-transport-https_2.8.3_all.deb ...
Unpacking apt-transport-https (2.8.3) ...
Setting up apt-transport-https (2.8.3) ...
Scanning processes...
Scanning candidates...
Scanning linux images...

Running kernel seems to be up-to-date.

Restarting services...

Service restarts being deferred:
/etc/needrestart/restart.d/dbus.service
systemctl restart systemd-logind.service
systemctl restart unattended-upgrades.service

No containers need to be restarted.

User sessions running outdated binaries:
linux @ session #1: login[926]
linux @ user manager service: systemd[1581]

No VM guests are running outdated hypervisor (qemu) binaries on this host.
linux@SiemSystem:~$
```

Instalação automática do Wazuh (All-in-One)

Execução do script oficial de instalação do Wazuh 4.9 em ambiente Ubuntu Server, realizando a instalação do Manager, Indexer e Dashboard em arquitetura integrada.

```
linux@SiemSystem:~$ curl -sO https://packages.wazuh.com/4.9/wazuh-install.sh && sudo bash ./wazuh-install.sh -a
08/02/2026 19:25:59 INFO: Starting Wazuh installation assistant. Wazuh version: 4.9.2
08/02/2026 19:25:59 INFO: Verbose logging redirected to /var/log/wazuh-install.log
08/02/2026 19:26:05 INFO: Verifying that your system meets the recommended minimum hardware requirements.
08/02/2026 19:26:05 INFO: Wazuh web interface port will be 443.
```

Verificação dos serviços Wazuh

```

linux@SiemSystem:~$
```

Validação do estado dos serviços críticos (wazuh-manager, wazuh-indexer e wazuh-dashboard), garantindo funcionamento correto da plataforma SIEM.

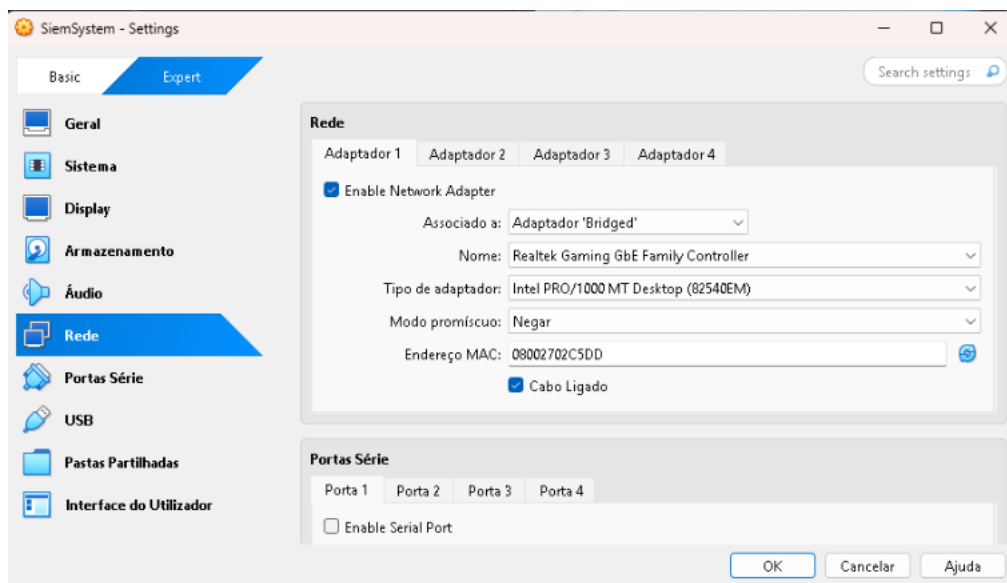

Atualizações do sistema(wazuh)

depois de instalar o sistema, recomendo você fazer um update e upgrade para atualizar o sistema, devido que o sistema e instalar so a base, e vai precisa de atualizações

```
sudo apt update
```

```
sudo apt upgrade -y
```

Configuração de rede na maquina virtual(Ubunto Server)

depois de reniciar a sua maquina virtual, voce deve inserir alguns comandos para iniciar o wazuh

```
sudo systemctl enable wazuh-indexer
```

```
sudo systemctl enable wazuh-manager
```

```
sudo systemctl enable wazuh-dashboard
```

```
linux@SiemSystem:~$ sudo apt upgrade
Reading package lists... Done
Building dependency tree... Done
Reading state information... Done
Calculating upgrade... Done
The following packages will be upgraded:
  filebeat wazuh-dashboard wazuh-indexer wazuh-manager
4 upgraded, 0 newly installed, 0 to remove and 0 not upgraded.
Need to get 1,558 MB of archives.
After this operation, 290 MB of additional disk space will be used.
Do you want to continue? [Y/n] y

Configuration file '/etc/wazuh-indexer/jvm.options'
==> Modified (by you or by a script) since installation.
==> Package distributor has shipped an updated version.
What would you like to do about it? Your options are:
Y or I : install the package maintainer's version
N or O : keep your currently-installed version
D      : show the differences between the versions
Z      : start a shell to examine the situation
The default action is to keep your current version.
*** jvm.options (Y/I/N/O/D/Z) [default=N] ? N

Verificar o ip do wazuh

Para voce ver o ip para acessar o dashboard do wazuh

hostname -I

```
linux@SiemSystem:~$ hostname -I
192.168.1.105 2001:818:dcb7:2d00:a00:27ff:fe02:c5dd
linux@SiemSystem:~$
```

Problema ao acessar o wazuh-dashboard

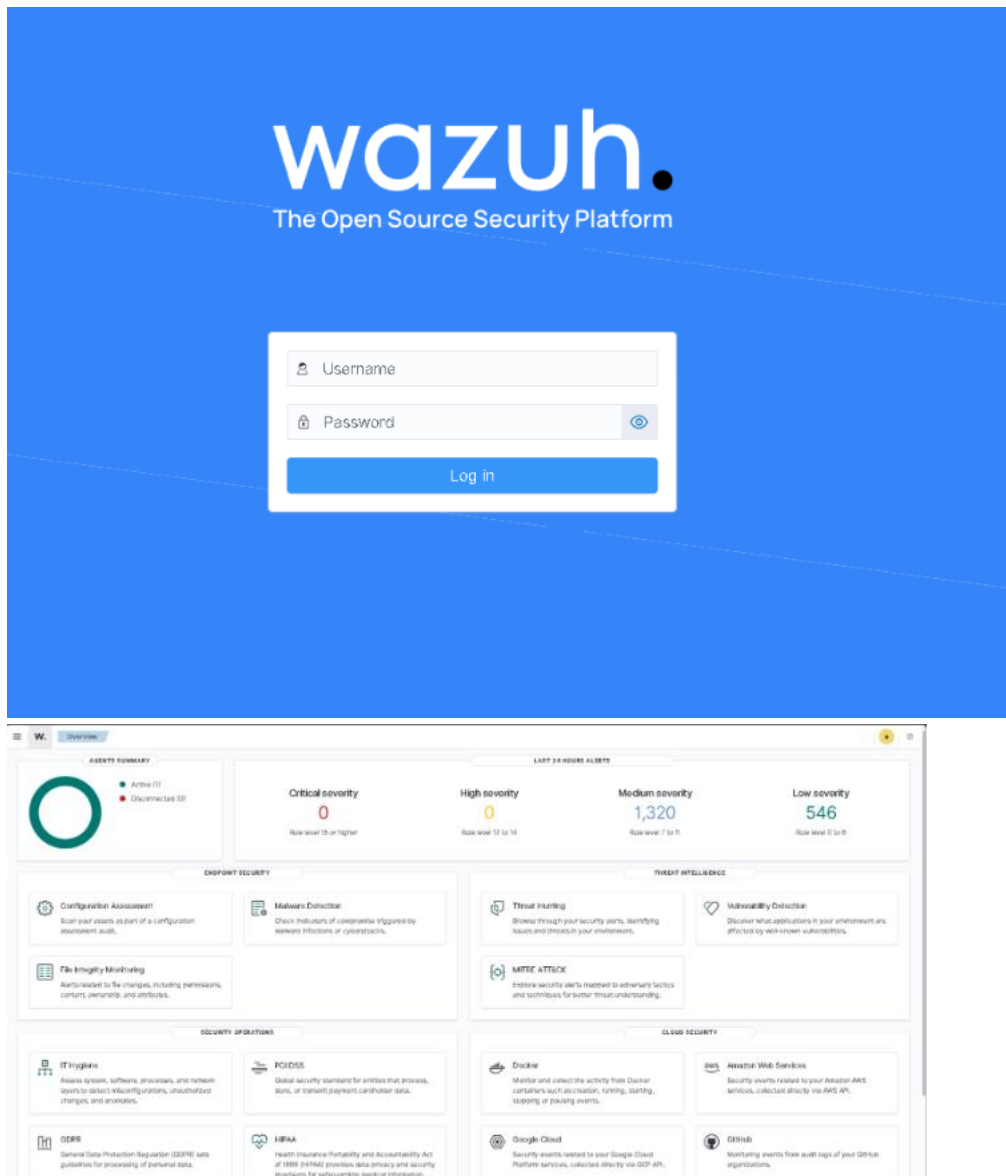

Resolver: Essa mensagem "**Wazuh dashboard server is not ready yet**" é muito comum logo após uma atualização ou quando o sistema acaba de ser reiniciado.

Espere 5 minutos: O Wazuh Indexer demora um pouco para verificar a integridade dos bancos de dados antes de liberar o acesso

Reinicie manualmente (se necessário): Se após 5 minutos continuar assim, force o reinício na ordem correta:

```
sudo systemctl restart wazuh-indexer sudo systemctl restart wazuh-manager sudo
systemctl restart wazuh-dashboard
```

Dashboard do Wazuh após instalação

Interface web do Wazuh acessível via navegador, confirmando conectividade e operacionalidade do ambiente SIEM.
